

Anatomy of the Best Built Band Saw

Pulleys

Balanced, cast aluminum alloy feature ball-bearing mounting, with oil resistant rubber facing

Frame Welding

Precise weldments deliver increased rigidity throughout the frame

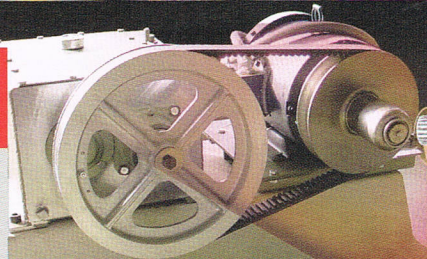

Cast Iron Table

Machined for rip fences and miter gauge, mounted on rigid wide cast trunnion. Tilts 45° down right and 5° down left

Transmission Assembly

We manufacture our own heat treated rolled gears and splines. Standard Vari-Drive and powerful 3 HP motor on all 4V models deliver accurate, reliable performance.

Gear Box

All GROB saws feature a 4 or 6 speed gearbox with a concrete base. The result is minimal vibration and superior rigidity for optimum sawing accuracy.
